

We are pleased to inform you that we have developed a new design for the **Aranet4 indoor air quality monitor** that includes the following improvements:

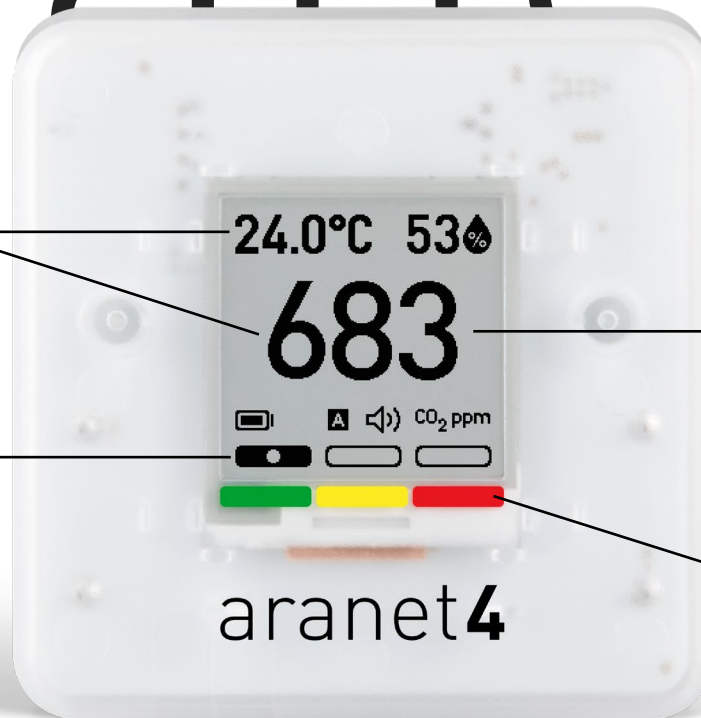

**New**

# aranet4

**Larger numbers** on the screen to make it easier to see them

**Adjustable CO<sub>2</sub> thresholds** (in the Aranet4 app) so you can set them as needed

**3255**

**The screen is inverted to alert** you when CO<sub>2</sub> concentration is too high and when action must be taken to increase the airflow

Larger, rectangular color indicators for **quick identification** of the CO<sub>2</sub> concentration zone you are in

We hope that these design changes will improve your user experience and make Aranet4 even more user-friendly.
